

Action Potential Simulation - APS Therapy

Less pain, more energy, faster recovery

Painfree Potential

Action Potential Simulation (APS) machines simulate the specific microcurrent waveform of action potentials, the body's own electrical communication system.

This enhances cellular communication and replicates the electron transport chain, stimulating the production of various neuro-hormones and transmitters, including ATP, melatonin, leukine enkephalin and beta-endorphins, recruiting the body's natural **healing, pain reduction, energy production, and anti-inflammatory** processes. *Unlike* TENS, results aren't instant, but can be more complete & long lasting. Benefits to the user include:

- Pain relief
- Faster recovery time for injury and sports
- Enhanced energy / reduced fatigue
- Enhanced wellbeing and sleep
- Improved mobility

Visit www.painfreepotential.co.uk for more **information, testimonials** and **research**

Results are often obtained with APS Therapy even after years, when nothing else has worked.

"...the older lady is delighted with her improvements in her neck. She now has no pain and better movement, something I couldn't achieve with manual therapy. - Penny Sawell Trimmer, Osteopath

"To be honest I can't quite believe it and am wondering if it's just a placebo effect (even if it is, I don't care, it's such a joy to have more normal sensations in hands & feet!)"

"In 5 years we have treated about 1500 patients with various kinds of complaints that vary from orthopaedic, surgical, internal medicine to neurology complaints. The majority of the patients were referred to us by our other therapeutic departments. The success rate for this group of patients is extremely high, about 70%." - Pain management clinic, Gemini Zeikenhuis hospital, NL.

APS Therapy can be used alone, or to enhance the results of hands-on therapy, and assist in achieving pain relief and enhanced wellbeing. It can be used at home, or in a clinic, & most people, once taught, can treat themselves independently. Treatment is painless and takes around 30 minutes, beginning with a course of sessions 2- ideally 3 x a week, for 3-6 weeks, and then, if necessary, for chronic pain conditions, once a week to maintain.

The best thing is, that
from 3 weeks in, I haven't
taken a single painkiller.
I'm most impressed.'
Bob Hone, Beds

*'It allows me to be active
and pain-free once more'
- Susan Parker, Hull*

*"Now I'm sleeping well at
night, and nothing is such an
effort any more. I want to
bottle it and give it to everyone
I know!"
Peppy, Cornwall*

'Machine works great.
Relieved much muscular
tension in the lower and
mid back area which has
really improved mobility'
Bruce Macdonald, London

'The APS has been
quite transformational
for my fatigue'
Ros, Berkshire

*"I had met people with near-
miraculous results for rheumatoid
arthritis, MS pain, tennis elbow
and more, so I thought there must
be something in it. Finally, I see
why"
Helen, Northants*
